Bank of Shanghai (Hong Kong) Limited

Directors’ Report and
Consolidated Financial Statements
for the year ended 31 December 2014

Contents **Page(s)**

Report of the directors

The directors have pleasure in submitting their annual report together with the audited financial statements for the year ended 31 December 2014.

Principal place of business

Bank of Shanghai (Hong Kong) Limited ("the Company") is a restricted licence bank incorporated and domiciled in Hong Kong and has its registered office and principal place of business at 2001-05 ICBC Tower, Citibank Plaza, 3 Garden Road, Hong Kong.

Principal activities

The principal activities of the Company are to provide financial services to corporations and individuals. The principal activities and other particulars of the Company's subsidiary are set out in note 18 to the financial statements.

Financial statements

The operating results of the Company and its subsidiary (together referred to as the "Group") for the year ended 31 December 2014 and the state of affairs of the Group and of the Company as of that date are set out in the financial statements on pages 5 to 85.

Transfer to reserves

The profit attributable to shareholders of HK$58,377,000 (2013: loss of HK$24,568,000) has been transferred to reserves. Other movements in reserves are set out in the consolidated statement of changes in equity on page 10.

The directors do not recommend payment of dividend for the financial year ended 31 December 2014 (2013: HK$13.49 per share).

Share capital

Details of share capital of the Company are set out in note 25 to the financial statements. During the year, the Company issued 140,438,500 shares at RMB10.00 each to its holding company at par to strengthen its capital position.

Charitable donations

Charitable donations made by the Group during the financial year amounted to HK$26,500 (2013: $25,000).

Directors

The directors of the Company during the year were:

Jin, Yu
Zhang, Weiguo
Huang, Tao
Fok, Lawrence Kwong Man
Ma, Charles Chi Man

Directors' interests in shares

At no time during the year was the Company, or any of its holding companies, or fellow subsidiaries a party to any arrangement to enable the directors of the Company to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

Directors' interests in contracts

No contract of significance to which the Company, or any of its holding companies or fellow subsidiaries was a party, and in which a director of the Company had a material interest, subsisted at the end of the year or at any time during the year.

Management contracts

No contracts concerning the management and administration of the whole or any substantial part of any business of the Company were entered into or existed during the year.

Statement of compliance

The financial statements for the year ended 31 December 2014 comply with the applicable disclosure provisions of the Banking (Disclosure) Rules.

Auditors

KPMG retire and, being eligible, offer themselves for re-appointment. A resolution for the re-appointment of KPMG as auditors of the Company is to be proposed at the forthcoming Annual General Meeting.

On behalf of the board

Charles Ma

Director

Hong Kong, 28 APR 2015

KPMG

Independent auditor's report to the shareholders of Bank of Shanghai (Hong Kong) Limited

(Incorporated in Hong Kong with limited liability)

We have audited the financial statements of Bank of Shanghai (Hong Kong) Limited ("the Company") and its subsidiary (together "the Group") set out on pages 5 to 85 which comprise the consolidated and the Company's statements of financial position as at 31 December 2014, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the financial statements

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants, and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. This report is made solely to you, as a body, in accordance with section 80 of Schedule 11 to the new Hong Kong Companies Ordinance (Cap. 622), and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

KPMG

Independent auditor's report to the shareholders of Bank of Shanghai (Hong Kong) Limited (continued)

(Incorporated in Hong Kong with limited liability)

Auditor's responsibility (continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of the affairs of the Group and of the Company as at 31 December 2014 and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.

Notes to the financial statements
(Expressed in Hong Kong dollars)

1 General information and significant accounting policies

(a) General information

The principal activities of the Company are to provide financial services to corporations and individuals.

The Company is a restricted licence bank incorporated and domiciled in Hong Kong and has its registered office and principal place of business at 2001-05 ICBC Tower, Citibank Plaza, 3 Garden Road, Hong Kong.

The Company established a subsidiary, BOSC International Company Limited, on 5 March 2014 and the subsidiary did not carry out any business activities during the year.

(b) Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs") with collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and accounting principles generally accepted in Hong Kong. These financial statements also comply with the applicable requirements of the Hong Kong Companies Ordinance, which for this financial year and the comparative period continue to be those of the predecessor Hong Kong Companies Ordinance (Cap. 32), in accordance with transitional and saving arrangements for Part 9 of the new Hong Kong Companies Ordinance (Cap. 622), "Accounts and Audit", which are set out in sections 76 to 87 of Schedule 11 to that Ordinance.

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting period of the Group and the Company. Note 2 provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these financial statements.

A summary of the significant accounting policies adopted by the Group and the Company is delineated below.

1 General information and significant accounting policies (continued)

(c) Basis of preparation

The consolidated financial statements for the year ended 31 December 2014 comprise the Company and its subsidiary (together referred to as the "Group").

The measurement basis used in the preparation of the financial statements is the historical cost basis except that financial instruments classified as trading, designated at fair value through profit or loss, or available-for-sale are stated at their fair value as explained in the accounting policies set out below.

The preparation of financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have significant effect in the financial statements and major sources of estimation uncertainty are discussed in note 3.

(d) Basis of consolidation

Subsidiary is an entity controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases.

Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses, unless the investment is classified as held for sale (or included in a disposal group that is classified as held for sale).

1 General information and significant accounting policies (continued)

(e) Financial instruments

(i) Initial recognition

The Group classifies its financial instruments into different categories at inception, depending on the purpose for which the assets were acquired or the liabilities were incurred. The categories are: fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets and other financial liabilities.

Financial instruments are measured initially at fair value, which normally will be equal to the transaction price plus, in case of a financial asset or financial liability not held at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset or issue of the financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

The Group recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets and financial liabilities is recognised using trade date accounting. From these dates, any gains and losses arising from changes in fair value of the financial assets or financial liabilities at fair value through profit or loss and available-for-sale financial assets are recorded.

(ii) Classification

Fair value through profit or loss

This category comprises financial assets and financial liabilities held for trading. Derivatives that do not qualify for hedge accounting are accounted for as trading instruments.

Financial assets and financial liabilities under this category are carried at fair value. Changes in the fair value are included in profit or loss in the period in which they arise. Upon disposal or repurchase, the difference between the net sale proceeds or the net payment and the carrying value is included in profit or loss.

1 General information and significant accounting policies (continued)

(e) Financial instruments (continued)

(ii) Classification (continued)

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than (a) those that the Group intends to sell immediately or in the near term, which will be classified as held for trading; (b) those that the Group, upon initial recognition, designates as at fair value through profit or loss or as available-for-sale; or (c) those where the Group may not recover substantially all of its initial investment, other than because of credit deterioration, which will be classified as available-for-sale. Loans and receivables mainly comprise loans and advances to customers and placements with banks.

Loans and receivables are carried at amortised cost using the effective interest method, less impairment losses, if any (see note 1(j)).

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified in any of the other two categories above and those not classified as held-to-maturity. They include financial assets intended to be held for an indefinite period of time, but which may be sold in response to needs for liquidity or changes in the market environment.

Available-for-sale financial assets are carried at fair value. Unrealised gains and losses arising from changes in the fair value are recognised in other comprehensive income and accumulated separately in equity, except for impairment losses and foreign exchange gains and losses on monetary items such as debt securities which are recognised directly in profit or loss.

Investments in equity securities that do not have a quoted market price in an active market and which fair value cannot be measured reliably, and derivatives that are linked to and must be settled by delivery of such unquoted equity securities are carried at cost less impairment losses, if any (see note 1(j)).

When the available-for-sale financial assets are sold, gains or losses on disposal include the difference between the net sale proceeds and the carrying value, and the accumulated fair value adjustments which are previously recognised in other comprehensive income shall be reclassified from equity to profit or loss.

Other financial liabilities

Financial liabilities, other than trading liabilities, are measured at amortised cost using the effective interest method.

1 General information and significant accounting policies (continued)

(e) Financial instruments (continued)

(iii) Fair value measurement principles

The fair value of financial instruments is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. Financial assets are priced at current bid prices, while financial liabilities are priced at current offer prices.

If there is no publicly available latest traded price nor a quoted market price on a recognised stock exchange or a price from a broker/dealer for non-exchange-traded financial instruments, or if the market for it is not active, the fair value of the instrument is estimated using valuation techniques that provide a reliable estimate of prices which could be obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the reporting date.

(iv) Derecognition

A financial asset is derecognised when the contractual rights to receive the cash flows from the financial asset expire, or where the financial asset together with substantially all the risks and rewards of ownership have been transferred.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expires.

(v) Offsetting

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position where there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

(vi) Embedded derivatives

An embedded derivative is a component of a hybrid (combined) instrument that includes both the derivative and a host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. The embedded derivatives are separated from the host contract and accounted for as a derivative when (a) the economic characteristics and risks of the embedded derivative are not closely related to the host contract; and (b) the hybrid (combined) instrument is not measured at fair value with changes in fair value recognised in the income statement.

When the embedded derivative is separated, the host contract is accounted for in accordance with note 1(e)(ii) above.

1 General information and significant accounting policies (continued)

(f) Fixed assets

Fixed assets are stated in the statement of financial position at cost less accumulated depreciation and impairment losses (see note 1(j)).

Gains or losses arising from the retirement or disposal of an item of fixed assets are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Depreciation is calculated to write off the cost or valuation of items of fixed assets, less their estimated residual value, if any, using the straight-line method over the estimated useful lives as follows:

– Leasehold improvements	Shorter of the lease term or their estimated useful lives to the Group
– Furniture, computer and other equipment	2 - 5 years
– Motor vehicles	4 years

Where parts of an item of fixed assets have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

(g) Intangible assets

Intangible assets included acquired software and club membership. Intangible assets are stated in the statement of financial position at cost less accumulated amortisation and impairment losses (see note 1(j)).

Amortisation of intangible assets with finite useful lives is charged to the statement of comprehensive income on a straight-line basis over the assets' estimated useful lives. The following intangible assets with finite useful lives are amortised from the date they are available for use and their estimated useful lives are as follow:

– acquired software	1 - 5 years

Both the period and method of amortisation are reviewed annually.

Intangible assets are not amortised while their useful lives are assessed to be indefinite. Any conclusion that the useful life of an intangible asset is indefinite is reviewed annually to determine whether events and circumstances continue to support the indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to definite is accounted for prospectively from the date of change and in accordance with the policy for amortisation of intangible assets with finite lives as set out above.

1 General information and significant accounting policies (continued)

(h) Leases and hire purchase contracts

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

(i) Classification

Leases which transfer substantially all the risks and rewards of ownership to the lessee are classified as finance leases. Leases which do not transfer substantially all the risks and rewards of ownership to the lessee are classified as operating leases.

(ii) Finance leases

Where the Group is a lessor under finance leases, an amount representing the net investment in the lease is included in the statement of financial position as loans and advances to customers. Hire purchase contracts having the characteristics of finance leases are accounted for in the same manner as finance leases. Impairment losses are accounted for in accordance with the accounting policy as set out in note 1(j).

Where the Group acquires the use of assets under finance leases, the amounts representing the fair value of the leased assets, or, if lower, the present values of the minimum lease payments of such assets, are included in fixed assets and the corresponding liabilities, net of finance charges, are recorded as obligations under finance leases. Depreciation is provided at rates which write off the cost or valuation of the assets over the term of the relevant leases or, where it is likely the Group will obtain ownership of the asset, the life of the asset, as set out in note 1(f). Impairment losses are accounted for in accordance with the accounting policy as set out in note 1(j). Finance charges implicit in the lease payments are charged to profit or loss over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period. Contingent rentals are written off as an expense of the accounting period in which they are incurred.

(iii) Operating leases

Where the Group has the use of assets held under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals are charged to profit or loss in the accounting period in which they are incurred.

The cost of acquiring land held under an operating lease is amortised on a straight-line basis over the period of the lease term.

1 General information and significant accounting policies (continued)

(i) Repossessed assets

In the recovery of impaired loans and advances, the Group may take possession of assets held as collateral through court proceedings or voluntary delivery of possession by the borrowers. Where it is intended to achieve an orderly realisation of the impaired assets and the Group is no longer seeking repayment from the borrowers, repossessed assets are reported in "Other assets". The Group does not hold the repossessed assets for its own use.

Repossessed assets are recorded at the lower of the amount of the related loans and advances and fair value less costs to sell at the date of repossession, and the related loans and advances together with the related impairment allowances are derecognised from the statement of financial position. They are not depreciated or amortised.

(j) Impairment of assets

(i) Financial assets

The carrying amount of the Group's assets is reviewed at each reporting date to determine whether there is objective evidence of impairment. Objective evidence that financial assets are impaired includes observable data that comes to the attention of the Group about one or more of the following loss events which has an impact on the future cash flows on the assets that can be estimated reliably:

- delinquency in contractual payments of principal or interest;
- cash flow difficulties experienced by the borrower;
- breach of loans covenants or conditions;
- initiation of bankruptcy proceedings;
- deterioration in the value of collateral; and
- a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

If any such evidence exists, the carrying amount is reduced to the estimated recoverable amount by means of a charge to profit or loss.

1 General information and significant accounting policies (continued)

(j) Impairment of assets (continued)

(i) Financial assets (continued)

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of loans and receivables which are measured at amortised cost, whose recovery is considered doubtful but not remote. In this case, the impairment losses are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against loans and receivables directly and any amounts held in the allowance account relating to that borrower are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

Loans and receivables

Impairment losses on loans and receivables are measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets). Receivables with a short duration are not discounted if the effect of discounting is immaterial.

The total allowance for credit losses consists of two components: individually assessed impairment allowances and collectively assessed impairment allowances.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

The individually assessed impairment allowance is based upon management's best estimate of the present value of the cash flows which are expected to be received discounted at the original effective interest rate. In estimating these cash flows, management makes judgements about the borrower's financial situation and the net realisable value of any underlying collateral or guarantees in favour of the Group. Each impaired asset is assessed on its own merits.

1 General information and significant accounting policies (continued)

(j) Impairment of assets (continued)

(i) Financial assets (continued)

Loans and receivables (continued)

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics. Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the Group and historical loss experience for assets with credit risk characteristics similar to those of the Group. Historical loss experience is adjusted on the basis of current observable data on economic and credit environment to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

Any subsequent changes to the amounts and timing of the expected future cash flows compared to the prior estimates that can be linked objectively to an event occurring after the write-down, will result in a change in the impairment allowances on loans and receivables and be charged or credited to profit or loss. A reversal of impairment losses is limited to the loans and receivables' carrying amount that would have been determined had no impairment loss been recognised in prior years.

When there is no reasonable prospect of recovery, the loan and the related interest receivables are written off.

Loans and receivables with renegotiated terms are loans that have been restructured due to deterioration in the borrower's financial position and where the Group has made concessions that it would not otherwise consider. Renegotiated loans and receivables are subject to ongoing monitoring to determine whether they remain impaired or past due.

Available-for-sale financial assets

When there is objective evidence that an available-for-sale financial asset is impaired, the cumulative loss that had been recognised in the fair value reserve is reclassified to profit or loss. The amount of the cumulative loss that is recognised in profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss.

For unquoted available-for-sale equity securities that are carried at cost, the impairment loss is measured as the difference between the carrying amount of the equity securities and the estimated future cash flows, discounted at the current market rate of return for a similar financial asset where the effect of discounting is material.

1 General information and significant accounting policies (continued)

(j) Impairment of assets (continued)

(i) Financial assets (continued)

Available-for-sale financial assets (continued)

Impairment losses recognised in profit or loss in respect of available-for-sale equity securities are not reversed through profit or loss. Any subsequent increase in the fair value of such assets is recognised in other comprehensive income.

Impairment losses in respect of available-for-sale debt securities are reversed if the subsequent increase in fair value can be objectively related to an event occurring after the impairment loss was recognised. Reversals of impairment losses in such circumstances are recognised in profit or loss.

(ii) Non-financial assets

Internal and external sources of information are reviewed at each reporting date to identify indications that the fixed and intangible assets may be impaired or an impairment loss previously recognised no longer exists or may have decreased.

If any such indication exists, the asset's recoverable amount is estimated. In addition, for intangible assets that are not yet available for use and intangible assets that have indefinite useful lives, the recoverable amount is estimated annually whether or not there is any indication of impairment.

– Calculation of recoverable amount

  The recoverable amount of an asset is the greater of its fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

– Recognition of impairment losses

  An impairment loss is recognised in profit or loss whenever the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro-rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, if measurable, or value in use, if determinable.

1 General information and significant accounting policies (continued)

(j) Impairment of assets (continued)

(ii) Non-financial assets (continued)

– Reversals of impairment losses

An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

A reversal of impairment losses is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

(k) Cash equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition.

For the purpose of the statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash and balances with banks and central bank and placements with banks.

(l) Employee benefits

It represents short-term employee benefits and contributions to defined contribution retirement plans.

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

(m) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, separately.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

1 General information and significant accounting policies (continued)

(m) Income tax (continued)

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits. Deferred income tax is determined using tax rates and law that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The principal temporary differences arise from asset impairment provisions, depreciation of fixed assets, revaluation of certain assets and tax losses carried forward. However, the deferred tax is not recognised if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax liabilities are provided in full on all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Current tax balances and deferred tax balances, and movements therein are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities if the Group or the Company has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Group or the Company intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or
- in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:
  - the same taxable entity; or
  - different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

1 General information and significant accounting policies (continued)

(n) Financial guarantees issued, provisions and contingent liabilities

(i) Financial guarantees issued

Financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the holder) for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Where the Group issues a financial guarantee to customers, the fair value of the guarantee (being the guarantee fees received) is initially recognised as deferred income within other liabilities.

The deferred income is amortised in profit or loss over the term of the guarantee as income from financial guarantees issued. In addition, provisions are recognised in accordance with note 1(n)(ii) if and when (i) it becomes probable that the holder of the guarantee will call upon the Group under the guarantee, and (ii) the amount of that claim on the Group is expected to exceed the amount currently carried in other liabilities in respect of that guarantee i.e. the amount initially recognised, less accumulated amortisation.

(ii) Other provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group or the Company has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

1 General information and significant accounting policies (continued)

(o) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Provided it is probable that economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

(i) Interest income

Interest income for all interest-bearing financial instruments is recognised in the profit or loss on an accruals basis using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

For impaired loans, the accrual of interest income based on the original terms of the loan is discontinued, but any increase in the present value of impaired loans due to the passage of time is reported as interest income.

(ii) Fee and commission income

Fee and commission income is recognised when the corresponding service is provided, except where the fee is charged to cover the costs of a continuing service to, or risk borne for, the customer, or is interest in nature. In these cases, the fee is recognised as income in the accounting period in which the costs or risk is incurred and is accounted for as interest income.

Origination or commitment fees received/paid by the Group which result in the creation or acquisition of a financial asset are deferred and recognised as an adjustment to the effective interest rate. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.

1 General information and significant accounting policies (continued)

(o) Revenue recognition (continued)

(iii) Finance income from finance lease and hire purchase contract

Finance income implicit in finance lease and hire purchase payments is recognised as interest income over the period of the leases so as to produce an approximately constant periodic rate of return on the outstanding net investment in the leases for each accounting period. Contingent rentals receivable are recognised as income in the accounting period in which they are earned. Commission paid to dealers for acquisition of finance lease loans or hire purchase contracts is included in the carrying value of the assets and amortised to profit or loss over the expected life of the lease as an adjustment to interest income.

(iv) Dividend income

Dividend income from unlisted investments is recognised when the shareholder's right to receive payment is established. Dividend income from listed investments is recognised when the share price of the investment is quoted ex-dividend.

(p) Translation of foreign currencies

Foreign currency transactions during the year are translated into Hong Kong dollars at the foreign exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated into Hong Kong dollars at the foreign exchange rates ruling at the reporting date. Exchange gains and losses are recognised in profit or loss.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into Hong Kong dollars using the foreign exchange rates ruling at the transaction dates. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated using the foreign exchange rates ruling at the dates the fair value was determined.

Exchange differences relating to derivative financial instruments and monetary items are presented in the statement of comprehensive income as net trading gain or loss. Differences arising on translation of available-for-sale equity instruments are recognised in reserves.

1 General information and significant accounting policies (continued)

(q) Related parties

(a) A person, or a close member of that person's family, is related to the Group if that person:

- (i) has control or joint control over the Group;
- (ii) has significant influence over the Group; or
- (iii) is a member of the key management personnel of the Group or the Group's parent.

(b) An entity is related to the Group if any of the following conditions applies:

- (i) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
- (iii) Both entities are joint ventures of the same third party.
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- (v) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.
- (vi) The entity is controlled or jointly controlled by a person identified in (a).
- (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

2 Changes in accounting policies

The HKICPA has issued the several amendments to HKFRSs and one new Interpretation that are first effective for the current accounting period of the Group. The Group has adopted the following amendments to standards and one new Interpretation which have insignificant or no effect on the consolidated financial statements of the Group:

– Amendments to HKFRS 10, HKFRS 12 and HKAS 27, *Investment entities*

– Amendments to HKAS 32, *Offsetting financial assets and financial liabilities*

– Amendments to HKAS 36, *Recoverable amount disclosures for non-financial assets*

– Amendments to HKAS 39, *Novation of derivatives and continuation of hedge accounting*

– HK(IFRIC) 21, *Levies*

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period (note 32).

3 Accounting estimates and assumptions

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Impairment allowance

Loans and advances to customers

Loan portfolios are reviewed periodically to assess whether impairment losses exist. The Group makes judgements as to whether there is any objective evidence that a loan portfolio is impaired, i.e. whether there is a decrease in estimated future cash flows. Objective evidence for impairment is described in note 1(j). If management has determined, based on their judgement, that objective evidence of impairment exists, expected future cash flows are estimated based on historical loss experience for assets with credit risk characteristics similar to those of the Group. Historical loss experience is adjusted on the basis of the current observable data. Management reviews the methodology and assumptions used in estimating future cash flows regularly to reduce any difference between loss estimates and actual loss experience.

4 Financial risk management

The Group's activities expose it to a variety of financial and operational risks and those activities involve analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The most important types of financial risks are credit risk, market risk and liquidity risk. Market risk includes currency risk, interest rate and price risk.

Taking risk is core to the financial business, and the financial and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks so as to set appropriate risk limits and controls, and to monitor the risks and adhere to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to cope with changes in markets, products and industry best practice.

Risk management functions are carried out by the specialised committees and the functional departments under the oversight of the Board of Directors. The Board provides guiding principles and directives for overall risk management including necessary policies covering the important risks as described below.

(a) Credit risk

Credit risk is the potential losses caused by obligor's inability to fulfil their contractual debt obligations. It arises from lending, treasury, derivatives and other activities undertaken by the Group. Credit exposures arise principally in loans and advances and debt securities in the Group's asset portfolio. There is also credit risk in off-balance sheet financial arrangements such as loan commitments.

The Group has established core procedures to foster its credit discipline in accordance with its credit policies.

The Group's approach to credit risk management focuses on monitoring and managing credit portfolios. Regular portfolio analyses are conducted to track the asset quality and support credit underwriting strategies on an ongoing basis. The Group's exposures to individuals, counterparties and products are subject to various risk control limits which are reviewed and approved from time to time. The senior management of the Group evaluates new product proposals as well as credit criteria for new account relationship approval and credit limit management. As a rule, credit quality takes precedence over opportunistic business development.

4 Financial risk management (continued)

(a) Credit risk (continued)

Facility requests are processed in the prescribed format and those conforming to defined credit criteria are approved within delegated credit approval authorities in compliance with established policies, standards and procedures. The Group's credit risk is being mitigated by taking of security under its secured lending transactions. Credit exceptions to defined criteria must be approved by an officer with sufficient exception approval authority. Exceptions are documented, tracked and submitted for review by senior management on a regular basis.

All credit exposures are subject to stringent collection, classification and charge-off policies. In addition, the Group performs loan loss analyses, taking into consideration the economic factors and loss identification periods, to determine the appropriate level of impairment allowances.

(i) Maximum exposure

The table below shows the maximum exposure to credit risk at the reporting date without taking into consideration any collateral held or other credit enhancements. For on-balance sheet assets, the exposures set out below are based on the carrying amount of each financial asset in the statement of financial position after deducting any impairment allowance. For loan commitments and other credit related commitments that are irrevocable over the life of the respective facilities or revocable in the extent of significant adverse change, the maximum exposure to credit risk is disclosed as the full amount of the committed facilities sought on these balances.

	The Group		*The Company*

4 Financial risk management (continued)

(a) Credit risk (continued)

(i) Maximum exposure (continued)

Credit risk mitigation, collateral and other credit enhancement

The Group uses a variety of techniques to reduce the credit risk arising from its lending activities. Enforceable legal documentation establishes the Group's direct, irrevocable and unconditional recourse to any collateral, security or other credit enhancement provided. The table below describes the nature of collateral held and their financial effect by class of financial asset:

Balances and placements with banks and central bank	:	These exposures are generally considered to be low risk due to the nature of the counterparties. Collateral is generally not sought on these balances.
Derivative financial assets	:	Master netting agreements are typically used to enable the effects of derivative financial assets and liabilities with the same counterparty to be offset in case of default.
Available-for-sale financial assets	:	No collateral is sought directly from the issuer. The fair value of these assets has reflected the credit risk element.
Loans and advances to customers	:	These exposures are secured, partially secured or unsecured depending on the type of customers and the products offered to them. Collaterals accepted by the Group includes residential properties, commercial real estates, share listed on a recognised stock exchange, standby letter of credit issued by banks accepted by the Group, bank deposits, etc.
Contingent liabilities and commitments	:	The components and the nature of contingent liabilities and commitments are disclosed in note 28. For commitments that are unconditionally cancellable, the Group would assess whether the credit facilities should be withdrawn whenever the Group is aware of the deterioration of borrower's credit quality. Accordingly, these commitments do not expose the Group to significant credit risk. For commitments that are not unconditionally cancellable, including letter of credit issued and other credit facilities, they are secured, partially secured or unsecured depending on the type of customers and the products offered to them.

4 Financial risk management (continued)

(a) Credit risk (continued)

(ii) Credit quality of loans and advances

As at 31 December 2014 and 2013, all placements with banks and loans and advances to customers were neither past due nor impaired. According to the loan classification system as defined by the HKMA, all these loans and advances are graded as “Pass”.

(iii) Credit quality of available-for-sale financial assets

As at 31 December 2014, all available-for-sale financial assets were neither past due nor impaired. The following table presents an analysis of available-for-sale debt securities investments by rating agency designation at the reporting date, based on Standard and Poor’s Rating Services or Moody’s Investors Services, to the respective issues of the debt securities. In the absence of such issue ratings, the ratings designated for the issuers are reported. If there are different ratings for the same securities, the securities are reported against the lower rating.

	The Group and the Company	
	2014	*2013*
	$’000	$’000
AA+ to A-	211,294	-
BBB	-	6,388
BB	-	41,226
	211,294	47,614

(iv) Enforceable netting arrangements or similar agreements

For the financial assets and liabilities subject to enforceable netting arrangements or similar agreements, each agreement between the Group and the counterparty allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis, in the absence of such an election, financial assets and liabilities will be settled on a gross basis. However, each party to the master netting arrangement or similar agreement will have the option to settle all such amounts on a net basis in the event of default of the other party.

The tables below present details of financial instruments subject to enforceable netting arrangements and similar agreements.

(b) Market risk

Market risk is the risk of loss on assets, liabilities and commitments arising from the net effect of changes in market rates, such as foreign exchange rates and interest rates.

The Group entered into foreign exchange, interest rate and money market transactions, solely for the purpose of hedging, funding or deployment of surplus liquidity. Financial instruments entered into in respect of the above objectives mainly include forward foreign exchange contracts and money market transactions.

4 Financial risk management (continued)

(b) Market risk (continued)

(i) Currency risk

The Group took on exposure due to effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board set limits on the level of certain foreign exchange exposures, which were managed by Treasury Department and monitored by Risk Management Department. The Group employed forward foreign currency exchange contracts to maintain its overall foreign currency exposure within such currency limit. The table below summarises the Group's exposures to foreign currency exchange rate risks that are recorded and not recorded in the statement of financial position.

The following table indicates the currency concentration of the assets and liabilities at carrying amounts in Hong Kong dollars equivalent, categorised by original currency.

(ii) Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates.

The Group took on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow interest rate risk. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Board set limits on the level of mismatch of interest rate repricing that may be undertaken, which were managed by Treasury Department and monitored by Risk Management Department.

4 Financial risk management (continued)

(b) Market risk (continued)

(ii) Interest rate risk (continued)

As at 31 December 2014, if market interest rates had been 1% higher with other variables maintained constant, profit before taxation for the year would have been $19.4 million higher (2013: loss before tax $1.0 million lower). However, if market interest rates had been 1% lower with other variables held constant, profit before tax for the year would have been $22.8 million lower (2013: the extent of decrease in interest rates was expected to be minimal which would increase the Group's loss before taxation by an insignificant amount).

The table below summarises the Group's and the Company's exposure to interest rate risk. It includes the Group's and the Company's financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

4 Financial risk management (continued)

(c) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due, and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

The Group's liquidity management process, managed by Treasury Department included:

- day-to-day funding managed by monitoring future cash flows to ensure that requirements can be met. This includes replenishment of funds as they mature or are borrowed by customers;

- maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;

- monitoring liquidity ratios against internal and regulatory requirements; and

- managing the concentration and profile of debt maturities.

Monitoring and reporting took the form of cash flow measurement and projections for the next day, week and month respectively, as these were key periods for liquidity management.

Treasury Department also monitored unmatched medium-term assets, the level and type of undrawn lending commitments, the usage of overdraft facilities and the impact of contingent liabilities.

Finance Department validated liquidity ratios and reported exceptions to Asset and Liability Committee ("ALCO").

Sources of liquidity were regularly reviewed by Treasury Department to maintain a diversification by provider, product and term.

4 Financial risk management (continued)

(c) Liquidity risk (continued)

(i) Maturity analysis

The table below sets out the maturity profile of assets and liabilities analysed by the remaining period to repayment as at the reporting date:

(ii) Undiscounted cash flows by contractual maturities

The table below presents the cash flows payable by the Group and the Company under non-derivative financial liabilities and derivative financial instruments by remaining contractual maturities at the reporting date, and also the cash flows payable in respect of other off-balance sheet items by the earliest date they could be called. The amounts disclosed in the table were the contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating based on rates prevailing at the reporting date), whereas the Group manages the inherent liquidity risk based on expected undiscounted cash flows.

4 Financial risk management (continued)

(d) Capital management

Being an authorised institution incorporated in Hong Kong, the Group is regulated by the HKMA which sets and monitors capital requirements for the Group.

The HKMA has issued the Banking (Capital) Rules, which require the Group to maintain adequate regulatory capital to support credit risk, market risk and operational risk.

In addition to meeting the regulatory requirements, the Group's primary objective in managing its capital is to ensure the Group's ability to continue as a going concern so that it can continue to provide returns and benefits to shareholders and other stakeholders. To achieve the targeted return, products and services are priced to commensurate with the level of risk and funds are acquired at a reasonable cost.

The Group actively and regularly reviews and manages its capital structure to maintain a balance between satisfactory shareholder returns and adequate security afforded by a sound capital position, and makes adjustments to the capital structure in light of any significant changes in economic conditions.

The Group monitors its capital structure with due consideration of the capital adequacy ratio as calculated in accordance with the Banking (Capital) Rules. The Group has adopted the Standardised (Credit Risk) Approach in calculating credit risk for non-securitisation exposures.

Throughout the years of 2014 and 2013, the Group fully complied with the capital requirements imposed by the HKMA.

4 Financial risk management (continued)

(e) Fair value of financial assets and liabilities

(i) Financial assets and liabilities measured at fair value

Fair value estimates are generally subjective in nature, and are made as of a specific point in time based on the characteristics of the financial instruments and relevant market information. The Group measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: fair value measured using quoted market prices (unadjusted) in active markets for identical assets and liabilities.

- Level 2: fair value measured using valuation techniques based on observable inputs, either directly or indirectly. This category includes quoted prices in active markets for similar financial instruments, or quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

- Level 3: fair value measured using significant unobservable inputs. This category includes inputs to valuation techniques not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect difference between the instruments.

Where available, the most suitable measure for fair value is the quoted market price. In absence of organised secondary markets for most of the unlisted securities and over-the-counter derivatives, direct market prices of these financial instruments may not be available. The fair values of such instruments are therefore calculated based on established valuation techniques using current market parameters or market prices provided by counterparties.

The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the reporting date. For other derivative financial instruments, the Group uses estimated discounted cash flows to determine their fair value and the discount rate used is a discount rate at the end of reporting period applicable for an instrument with similar terms and conditions.

4 Financial risk management (continued)

(e) Fair value of financial assets and liabilities (continued)

(i) Financial assets and liabilities measured at fair value (continued)

The table below analyses financial instruments, measured at fair value as at 31 December 2014, by the level in the fair value hierarchy into which the fair value treatment is categorised:

The Group and the Company

	2014			
	Level 1 $'000	*Level 2* $'000	*Level 3* $'000	*Total* $'000
Recurring fair value measurements				
Assets				
Derivative financial assets	-	7,287	254	7,541
Available-for-sale financial assets	99,923	111,371	-	211,294
Liabilities				
Derivative financial liabilities	-	9,530	-	9,530

The Group and the Company

	2013			
	Level 1 $'000	*Level 2* $'000	*Level 3* $'000	*Total* $'000
Recurring fair value measurements				
Assets				
Available-for-sale financial assets	-	47,614	-	47,614
Liabilities				
Derivative financial liabilities	-	302	-	302

During the years of 2014 and 2013, there were no transfers of financial instruments between Level 1 and Level 2. The Group's policy is to recognise transfers between levels of fair value hierarchy as at the end of the reporting period in which they occur.

4 Financial risk management (continued)

(e) Fair value of financial assets and liabilities (continued)

(i) Financial assets and liabilities measured at fair value (continued)

Valuation of financial instruments with significant unobservable inputs

The following table shows a reconciliation from the beginning balance to the ending balance for fair value measurements in Level 3 of the fair value hierarchy:

The Group and the Company

	Derivative financial assets	
	2014	*2013*
	$'000	$'000
At 1 January	-	-
Purchases/initiation	973	-
Sales	-	-
Settlements	-	-
Transfer in	-	-
Transfer out	-	-
Changes in fair value recognised in the profit or loss:		
– Net trading (losses)/gain	(719)	-
At 31 December	254	-
Total gains or losses for the year included in the profit or loss for assets held at the end of the reporting period recorded in:		
– Net trading (losses)/gain	(719)	-

4 Financial risk management (continued)

(e) Fair value of financial assets and liabilities (continued)

(i) Financial assets and liabilities measured at fair value (continued)

The table below sets out information about significant unobservable inputs used at year end in measuring financial instruments categorised as Level 3 in the fair value hierarchy.

	Valuation techniques	*Significant unobservable input*	*Range*	*Fair value measurement sensitivity to unobservable inputs*
Equity derivative embedded in loans and advances to customers	Trinomial Tree model	Volatility of stock price	30.53% to 52.93%	Increase in the volatility would result in higher fair value.
		Credit spread	14.91% to 28.77%	Increase in credit spread would result in lower fair value.

Effect of changes in significant unobservable assumptions to reasonably possible alternative assumptions

Although the Group believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3 of the fair value hierarchy, changing one or more of the unobservable inputs used for reasonably possible alternative assumptions would have the following effects:

The Group and the Company

	Reflected in profit or loss	
	Favourable changes $’000	*Unfavourable changes* $’000
2014		
Derivative financial assets		
– Embedded equity derivatives	646	(254)

4 Financial risk management (continued)

(e) Fair value of financial assets and liabilities (continued)

(ii) Financial assets and liabilities not measured at fair value

Financial assets and liabilities that are presented not at their fair value on the Group's consolidated statement of financial position and the Company's statement of financial position mainly represent cash and balances with banks and central bank, placements with banks, and loans and advances to customers. These financial assets are measured at amortised cost less impairment. Financial liabilities not presented at their fair value on the Group's consolidated statement of financial position and the Company's statement of financial position mainly represent deposits from banks, deposits from customers and certificates of deposit issued. These financial liabilities are measured at amortised cost.

The Group assessed that the differences between fair values and carrying amounts of those financial assets and liabilities not presented on the Group's and the Company's statement of financial position at their fair values are minimal as most of the Group's and the Company's financial assets and liabilities are either short-term or priced at floating rates.

(f) Transfers of financial assets

The Group enters into transactions in the normal course of business which transfers recognised financial assets directly to third party. In 2014, all these transfers resulted in full derecognition of the financial assets concerned as the Group transferred its contractual right to receive cash flows from these financial assets, or retained the rights but assumed an obligation to pass on the cash flows from these financial assets, and transferred substantially all the risks and rewards of ownership. The risks included credit, interest rate, currency, prepayment and other price risks.

As at 31 December 2014, there were no outstanding transferred financial assets in which the Group had a continuing involvement, that were derecognised in their entirety.

In 2013, the Group did not engage in any transfer of financial assets.

5 Net interest income

	2014	*2013*
	$'000	$'000
Interest income		
Interest income arising from financial assets that are not measured at fair value through profit or loss		
– Balances and placements with banks	173,552	7,082
– Loans and advances to customers	73,783	1,734
– Unlisted available-for-sale financial assets	555	1,052
– Listed available-for-sale financial assets	2,003	-
	249,893	9,868
Interest expense		
Interest expense arising from financial liabilities that are not measured at fair value through profit or loss		
– Deposits from banks	(18,750)	(809)
– Deposits from customers	(99,778)	(4,572)
– Certificates of deposit issued	(1,288)	-
– Others	(6)	(4)
	(119,822)	(5,385)
Net interest income	130,071	4,483

There was no interest income accrued on impaired financial assets and on unwinding of discount on loan impairment losses for the years ended 31 December 2014 and 2013.

6 Net fee and commission income

	2014	*2013*
	$'000	$'000
Fee and commission income		
– Credit facilities	51,614	11,426
– Trade services	881	115
– Others	291	11
	52,786	11,552
Fee and commission expense	(280)	(106)
Net fee and commission income	52,506	11,446

All the fee and commission income of $52,786,000 (2013: $11,552,000) and fee and commission expense of $280,000 (2013: $106,000) for the year ended 31 December 2014 arose from financial assets and financial liabilities that were not measured at fair value through profit or loss.

No net fee and commission income arose from trust or other fiduciary activities in which the Group held or invested on behalf of its customers for the years ended 31 December 2014 and 2013.

7 Net trading (loss)/gain

	2014	*2013*
	$'000	$'000
Foreign exchange (loss)/gain	(31,006)	78
Other derivatives	(719)	-
	(31,725)	78

The foreign exchange losses in 2014 included the translation loss of $47 million on those RMB assets funded by the Company's capital denominated in RMB (which is recorded on these financial statements at historical exchange rate) due to the deprecation of RMB against HKD in 2014. Excluding this translation loss, foreign exchange trading gain from normal activities was $16 million.

8 Operating expenses

	2014	*2013*
	$'000	$'000
Staff costs		
– Salaries and other benefits	36,543	21,411
– Pension and provident fund costs	2,257	1,371
	38,800	22,782
Premises and equipment expenses excluding depreciation		
– Rental of premises	8,398	4,764
– Maintenance and office facility expenses	1,226	603
– Others	721	428
	10,345	5,795
Auditor's remuneration		
– Statutory audit services	500	400
– Non-statutory audit and other services	288	8
Depreciation of fixed assets	6,119	2,759
Amortisation of intangible assets	1,864	928
Legal and professional fees	2,510	5,319
IT and system expenses	4,141	4,777
Other operating expenses	3,214	1,586
	18,636	15,777
	67,781	44,354

9 Loan impairment charges

	2014	*2013*
	$'000	$'000
Loan impairment charges (note 16(b))	7,603	558
Representing:		
New provision (note 16(b))	7,603	558

10 Directors' emoluments

	2014	*2013*
	$'000	$'000
Fees	120	70
Other emoluments	4,139	2,893
Contribution to provident fund	197	175
	4,456	3,138

11 Taxation

(a) Taxation in the statement of comprehensive income represents:

	2014	*2013*
	$'000	$'000
Current tax		
Hong Kong Profits Tax		
– Provision for the year	-	-
– Over-provision in prior year	(10)	-
	(10)	-
Taxation outside Hong Kong		
– Withholding tax in the People's Republic of China	12,032	446
	12,032	446
Deferred tax		
Origination and reversal of temporary differences	5,183	(4,782)
	17,205	(4,336)

The provision of Hong Kong Profits Tax for 2014 was calculated at 16.5% (2013: 16.5%) of the estimated assessable profits for the year.

11 Taxation (continued)

(b) Reconciliation between tax expense and accounting profit/(loss) at applicable tax rates:

	2014	*2013*
	$'000	$'000
Profit/(loss) before taxation	75,582	(28,904)
Notional tax on profit/(loss) before tax, calculated at the tax rate of 16.5%	12,471	(4,769)
Tax effect of income/expense not subject to taxation	(7,320)	-
Over-provision in prior year	(10)	-
Foreign withholding tax	12,032	446
Others	32	(13)
	17,205	(4,336)

12 Profit attributable to equity shareholders of the Company

The consolidated profit attributable to equity shareholder of the Group included a profit of $61,773,000 (2013: loss of $24,568,000) which has been dealt with the financial statements of the Company.

13 Other comprehensive income

(a) Tax effects relating to each component of other comprehensive income

Balance at 31 December 2014		2,000,000	9,386	(988)	27,517	2,035,915

25 Capital and reserves (continued)

(b) Share capital

	2014 No. of shares '000	$'000	*2013* No. of shares '000	$'000
Authorised: (note 1)				
Ordinary shares of $10 each (note 2)	-	-	50,000	500,000
Issued and fully paid:				
At 1 January	20,000	200,000	25,000	250,000
Allotment of new shares	140,439	1,800,000	-	-
Share repurchase	-	-	(5,000)	(50,000)
At 31 December	160,439	2,000,000	20,000	200,000

In 2013, the Company repurchased 5,000,000 shares at par pursuant to the special resolution passed by the shareholders.

In January 2014, the Company increased its authorised share capital by the creation of 400,000,000 shares of RMB10.00 each totalling RMB4,000,000,000. Upon issuance, such new RMB shares are to rank pari passu as regards dividends and in all respects with the existing ordinary shares of the Company. The Company then issued 140,438,500 shares of RMB10.00 each to its holding company at par to strengthen its capital position.

Note 1: Under the new Hong Kong Companies Ordinance (Cap. 622), effective from 3 March 2014, the concept of authorised share capital no longer exists.

Note 2: In accordance with section 135 of the new Hong Kong Companies Ordinance (Cap. 622), the company's shares no longer have a par or nominal value with effect from 3 March 2014. There is no impact on the number of shares in issue or the relative entitlement of any of the members as a result of this change.

25 Capital and reserves (continued)

(c) Dividends

Dividends approved and paid during the year

	2014	*2013*
	$'000	$'000
No dividend approved or paid during the year (2013: $13.49 per share)	-	269,931

(d) Nature and purpose of reserves

(i) Available-for-sale fair value reserve

This comprises the cumulative net change in the fair value of available-for-sale financial assets until the financial assets are derecognised and is dealt with in accordance with the accounting policies adopted for the measurement of the available-for-sale financial assets at fair value.

(ii) Retained profits/accumulated losses

The Group is required to maintain minimum capital adequacy ratio set by the HKMA. The minimum capital requirements could therefore potentially restrict the amount of retained profits available for distribution to the shareholders.

(iii) Regulatory reserve

The regulatory reserve is maintained in accordance with Hong Kong Banking regulations. At 31 December 2014, a regulatory reserve of $27,517,000 (2013: $986,000) was maintained to satisfy the provisions of the Hong Kong Banking Ordinance for prudential supervision purposes. Movement in this reserve was made directly through retained profits under consultation with the HKMA. The regulatory reserve is non-distributable.

26 Material related party transactions

During the year, the Group entered into transactions with related parties in the normal course of business including accepting and placement of inter-bank deposits, conducting correspondent banking and foreign exchange transactions. All these related party transactions were priced at the relevant market rates at the time of each transaction.

(a) The amount of material related party transactions during the year and outstanding balances at the reporting date are set out below:

	The Group	
	Immediate holding company	
	2014	*2013*
	$'000	$'000
Consolidated statement of comprehensive income:		
Interest income	62,426	-
Interest expense	(3,486)	(22)
Consolidated statement of financial position:		
Amounts due from:		
– Cash and balances with banks and central bank	8	-
– Placement with banks	226,707	-
– Derivative financial assets	5,236	-
– Other assets	4,320	-
Amounts due to:		
– Deposits from banks	474,046	-
– Other liabilities	817	-
Derivative contracts:		
– Contract amount	587,412	-

26 Material related party transactions (continued)

(a) The amount of material related party transactions during the year and outstanding balances at the reporting date are set out below: (continued)

	The Company			
	Immediate holding company		*Subsidiary*	
	2014	*2013*	*2014*	*2013*
	$'000	$'000	$'000	$'000
Statement of financial position:				
Amounts due from:				
– Cash and balances with banks and central bank	8	-	-	-
– Placement with banks	226,707	-	-	-
– Derivative financial assets	5,236	-	-	-
– Other assets	4,320	-	3,122	-
Amounts due to:				
– Deposits from banks	474,046	-	-	-
– Deposits from customers	-	-	10,000	-
– Other liabilities	817	-	-	-
Derivative contracts:				
– Contract amount	587,412	-	-	-

(b) Directors and key management personnel

During the year, the Group did not provide any credit facilities nor accept any deposits from the directors and key management personnel of the Group and its holding companies as well as their close family members and companies controlled or significantly influenced by them.

Remunerations, for key management personnel, including amounts paid to the Group's directors as disclosed in note 10, are as follows:

	2014	*2013*
	$'000	$'000
Salaries and other benefits	6,499	5,507
Contribution to provident fund	599	476
Variable bonuses	4,630	2,290

27 Derivative financial instruments

Derivatives entered into by the Group include foreign exchange forward and swap contracts. The Group used these derivatives in its own assets and liabilities management and also sold these products to customers as normal banking activities. For these transactions entered into with customers, they were actively managed through offsetting deals with external parties to ensure the Group's net exposures were within acceptable level of risk. No significant proprietary positions were maintained by the Group at 31 December 2014 and 2013.

(a) Notional amounts of derivatives

Derivatives refer to financial contracts, the value of which links to the value of one or more underlying assets or indices. The notional amount of these instruments represents the volume of outstanding transactions and not the amount at risk.

The Group and the Company

At 31 December 2014

	Qualifying for hedge accounting $'000	*Managed in conjunction with financial instruments designated at fair value through profit or loss* $'000	*Others, including held for trading* $'000	*Total* $'000
Exchange rate contracts				
– Forwards	-	-	1,177,679	1,177,679
– Swaps	-	-	1,828,510	1,828,510
Equity contracts	-	-	104,000	104,000
	-	-	3,110,189	3,110,189

27 Derivative financial instruments (continued)

(a) Notional amounts of derivatives (continued)

The Group and the Company

At 31 December 2013

	Qualifying for hedge accounting $'000	*Managed in conjunction with financial instruments designated at fair value through profit or loss* $'000	*Others, including held for trading* $'000	*Total* $'000
Exchange rate contracts				
– Swaps	-	-	100,328	100,328

All these derivatives were with residual maturity of one year or less.

(b) Fair values and credit risk-weighted amounts of derivatives

Credit risk-weighted amount refers to the amount as computed in accordance with the Banking (Capital) Rules and depends on the status of the counterparty and the residual maturity of the transaction. The risk-weight factor for derivatives outstanding at 31 December 2014 ranged from 20% to 100% (2013: 20%).

Derivative financial instruments are presented in net when there is a legally enforceable right to set off the recognised amounts, and there is an intention to settle them on a net basis or realise the asset and settle the liability simultaneously. As at 31 December 2014, no derivative financial instruments have fulfilled the above criteria, therefore no derivative financial instruments were offset on the statement of financial position (2013: Nil).

27 Derivative financial instruments (continued)

(b) Fair values and credit risk-weighted amounts of derivatives (continued)

The Group and the Company

At 31 December 2014

	Derivative financial assets $'000	*Derivative financial liabilities* $'000	*Credit risk-weighted amounts* $'000
Exchange rate contracts			
– Forwards	5,236	4,893	8,124
– Swaps	2,051	4,637	3,588
Equity contracts	254	-	6,495
	7,541	9,530	18,207

The Group and the Company

At 31 December 2013

	Derivative financial assets $'000	*Derivative financial liabilities* $'000	*Credit risk-weighted amounts* $'000
Exchange rate contracts			
– Swaps	-	302	201

28 Contingent liabilities and commitments

(a) Contingent liabilities and commitment to extend credit

	The Group and the Company	
	2014	*2013*
	$'000	$'000
Contract amounts		
– Trade-related contingencies	4,838	1,007
– Transaction-related contingencies	1,030	-
– Other commitments		
– which are unconditionally cancellable	362,066	54,649
– with an original maturity under one year	155,117	-
– with an original maturity over one year	105,014	-
	628,065	55,656
Credit risk weighted amounts	84,374	201

Contingent liabilities and commitments are credit related instruments. The risk involved in these credit-related instruments is essentially the same as the credit risk involved in extending loan facilities to customers. The contractual amounts represent the amounts at risk should the contract be fully drawn and the customer would be in default. As the facilities may expire without being drawn, the contract amounts do not represent expected future cash flows.

The risk weight factor for the computation of credit risk weighted amounts range from 0% to 100%.

28 Contingent liabilities and commitments (continued)

(b) Lease commitments

At 31 December 2014, the total future minimum lease payments under non-cancellable operating leases are as follows:

	The Group and the Company	
	2014	*2013*
	$'000	$'000
Within 1 year	12,144	6,070
After 1 year but within 5 years	1,880	7,615
	14,024	13,685

The Group leases properties under operating leases. These leases run for an initial period of 1-3 years, with an option to renew the lease subject to renegotiation of the terms of the lease. None of the leases contains contingent rentals.

29 Loans to officers

Particulars of loans made to officers and disclosed pursuant to Section 161B of the Hong Kong Companies Ordinance are as follows:

	The Group and the Company	
	2014	*2013*
	$'000	$'000
Aggregate amount in respect of principal and interest as at 31 December	-	-
The maximum aggregate amount outstanding in respect of principal and interest during the year	-	-

30 Notes to consolidated statement of cash flows

(a) Reconciliation of profit/(loss) before taxation to net cash inflow from operating activities

	2014	*2013*
	$'000	$'000
Profit/(loss) before taxation	75,582	(28,904)

Change in balances and placements with banks with original maturity beyond three months	(2,170,173)	(258,543)
Change in gross loans and advances to customers	(3,411,781)	(154,459)
Change in other assets	(16,759)	(4,896)
Change in deposits from customers	3,340,737	967,561
Change in deposits from banks	2,147,636	130,987
Change in certificates of deposit issued	418,024	-
Change in other liabilities	6,237	7,518
Elimination of exchange differences and other non-cash items	2,764	470
Cash generated from operating activities	384,321	660,698
Hong Kong Profits Tax refunded	434	3,055
PRC withholding tax paid	(9,051)	-
Net cash inflow from operating activities	375,704	663,753

30 Notes to consolidated statement of cash flows (continued)

(b) Cash and cash equivalents in the consolidated statement of cash flows:

	2014 $'000	*2013* $'000
Cash and balances with banks and central bank	74,616	27,370
Placements with banks with original maturity within three months	2,719,142	760,275
	2,793,758	787,645

(c) Reconciliation with the consolidated statement of financial position:

	2014 $'000	*2013* $'000
Cash and balances with banks and central bank (note 14)	74,616	27,370
Placements with banks (note 15)	5,147,858	1,018,818
Amounts recognised in the consolidated statement of financial position	5,222,474	1,046,188
Less: Placements with banks with original maturity beyond three months	(2,428,716)	(258,543)
Cash and cash equivalents in the consolidated statement of cash flows	2,793,758	787,645

31 Immediate and ultimate holding companies

As at 31 December 2014, the Company's immediate and ultimate holding companies were Bank of Shanghai Co., Limited. Bank of Shanghai Co., Limited produces financial statements available for public access.

32 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2014

Up to the date of issue of the financial statements, the HKICPA has issued a few amendments and new standards which were not yet effective for the year ended 31 December 2014 and thus was not adopted in these financial statements. These include the following which may be relevant to the Group.

	Effective for accounting periods beginning on or after
Annual improvements to HKFRSs 2010-2012 cycle	1 July 2014
Annual improvements to HKFRSs 2011-2013 cycle	1 July 2014
Annual improvements to HKFRSs 2012-2014 cycle	1 January 2016
Amendments to HKAS 16 and HKAS 38, *Clarification of acceptable methods of depreciation and amortisation*	1 January 2016
HKFRS 15, *Revenue from contracts with customers*	1 January 2017
HKFRS 9, *Financial instruments*	1 January 2018

The Group is in the process of making assessment of what the impact of these amendments is expected in the initial application. So far it has been concluded that the adoption of them is unlikely to have significant impact to the Group's results of operation and financial position except for HKFRS 15, *Revenue from contracts with customers* and HKFRS 9, *Financial Instruments*.

- In July 2014, the HKICPA issued HKFRS 15 *Revenue from contracts with customers*. The standards will be effective for fiscal financial periods beginning on or after 1 January 2017 with early adoption permitted. HKFRS 15 provides a principle-based approach for revenue recognition, and introduces the concept of recognizing revenue for obligations as they are satisfied. The standard should be applied retrospectively, with certain practical expedients available. The Group is currently assessing the impact of this standard but it is not practicable to quantify the effect as at the date of the publication of these consolidated financial statements.

32 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2014 (continued)

– In September 2014, the HKICPA issued the final HKFRS 9, *Financial Instruments* which is the comprehensive standard to replace HKAS 39 *Financial Instruments: Recognition and Measurement* and includes requirements for classification and measurement of financial assets and liabilities, impairment of financial assets and hedge accounting. The classification and measurement of financial assets will depend on the entity's business model for their management and their contractual cash flow characteristics and result in financial assets being classified and measured at amortised cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss. The classification of financial liabilities is essentially unchanged, except that, for certain liabilities measured at fair value, gains or losses relating to changes in the entity's own credit risk are to be included in other comprehensive income.

  The impairment requirements apply to financial assets measured at amortised cost and FVOCI, lease receivables, certain loan commitments and financial guarantee contracts. At initial recognition, allowance (or provision in the case of commitments and guarantees) is required for expected credit losses ("ECL") resulting from default events that are possible within the next 12 months ("12 month ECL"). In the event of a significant increase in credit risk, allowance (or provision) is required for ECL resulting from all possible default events over the expected life of the financial instrument ("lifetime ECL").

  The assessment of whether credit risk has increased significantly since initial recognition is performed for each reporting period by considering the probability of default occurring over the remaining life of the financial instrument, rather than by considering an increase in ECL.

  As a result of the final HKFRS 9, the recognition and measurement of impairment is intended to be more forward-looking than under HKAS 39.

  The classification and measurement and impairment requirements are applied retrospectively by adjusting the opening statement of financial position at the date of initial application, with no requirement to restate comparative periods.

  The Group is presently studying the implications of applying HKFRS 9 but it is impracticable to quantify its effect as at the date of publication of these consolidated financial statements.

32 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2014 (continued)

In addition, the requirements of Part 9, "Accounts and Audit", of the new Hong Kong Companies Ordinance (Cap. 622) come into operation from the Group's first financial year commencing after 3 March 2014 (i.e. the Group's financial year which began on 1 January 2015) in accordance with section 358 of that Ordinance. The Group is in the process of making an assessment of the expected impact of the changes in the new Hong Kong Companies Ordinance on the financial statements in the period of initial application of Part 9. So far it has concluded that the impact is unlikely to be significant and will primarily only affect the presentation and disclosure of information in the financial statements.

Unaudited supplementary financial information

(Expressed in Hong Kong dollars)

The notes to the financial statements and the following unaudited supplementary information are prepared to comply with the Banking (Disclosure) Rules.

1 Overdue and rescheduled assets

(a) Gross loans and advances overdue for more than three months

As at 31 December 2014 and 2013, there were no overdue loans and advances to customers and placements with banks.

(b) Rescheduled loans and advances

As at 31 December 2014 and 2013, there were no rescheduled loans and advances to customers and placements with banks.

Rescheduled loans and advances are those loans and advances which have been restructured or renegotiated because of deterioration in the financial position of the borrower, or the inability of the borrower to meet the original repayment schedule and for which the revised payment terms are inferior to the original payment terms. The rescheduled loans and advances are stated net of any loans and advances that have subsequently become overdue for over three months and reported as overdue loans and advances as above.

(c) Other overdue and rescheduled assets

At 31 December 2014 and 2013, there were no other overdue and rescheduled assets.

2 Liquidity ratio

	2014	*2013*
	%	%
Average liquidity ratio for the year	165	4,167,128

The average liquidity ratio for the year was calculated as the simple average of each calendar month’s average liquidity ratio, which was computed on a single company basis as required by the HKMA for its regulatory purposes, and was in accordance with the Fourth Schedule to the Hong Kong Banking Ordinance.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management

(a) Capital ratios

The capital ratios calculated in accordance with the Banking (Capital) Rules are as follows:

	2014	*2013*
	%	%
Common Equity Tier 1 ("CET1") capital ratio	41.2%	23.3%
Tier 1 capital ratio	41.2%	23.3%
Total capital ratio	41.9%	23.5%

The capital ratios of the Group were computed on the basis as required by the HKMA. For accounting purpose, the consolidated financial statements include the Company and BOSCI. However, under the regulatory guideline, BOSCI is not required to be consolidated for regulatory purpose as it was only established in the first quarter of 2014 and yet to commence business operation as of 31 December 2014. Details of the subsidiary not being consolidated for regulatory purpose are as follows:

Name of company	*Principal activities*	*Total assets as at 31 December 2014*	*Total equity as at 31 December 2014*
		$'000	$'000
BOSC International Company Limited	Corporate finance	10,000	6,404

In calculating the risk-weighted amount, the Group adopted the Standardised (Credit Risk) Approach for credit risk and the Standardised (Market Risk) Approach for market risk. For operational risk, the capital requirement was determined by using the Basic Indicator Approach.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(b) Capital structure

The capital base after all required deductions for calculation of capital adequacy ratio purpose are shown below:

	2014	*2013*

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(c) Additional capital disclosures

The following items are included in the "Regulatory Disclosure" section in our website at www.bankofshanghai.com.hk:

- A detailed breakdown of the Group's CET1 capital, AT1 capital, T2 capital and regulatory deductions, using the standard template as specified by the HKMA.

- A full reconciliation between the Group's CET1 capital, AT1 capital, T2 capital and regulatory deductions and the Group's statement of financial position in the financial statements.

- A description of the main features and the full terms and conditions of the Group's capital instruments.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(d) Credit risk

(i) Capital requirement

The capital requirement on each class of exposures calculated under the Standardised (Credit Risk) Approach at the reporting date are summarised as follows:

	2014	*2013*
	$'000	$'000
Class of exposures		
Bank	228,071	24,632
Corporate	113,175	12,798
Other exposures which are not past due exposures	22,379	1,413
Total capital requirement for on-balance sheet exposures	363,625	38,843
Trade-related contingencies	68	16
Other commitments	6,682	-
Exchange rate contracts	937	16
Equity contracts	520	-
Credit valuation adjustment	530	44
Total capital requirement for off-balance sheet exposures	8,737	76
	372,362	38,919

The capital requirement is made by multiplying the Group's risk-weighted amounts derived from the relevant calculation approach by 8 per cent. The Group's capital as at 31 December 2014 was $2,038,267,000 (2013: $165,046,000), which well exceeded the aforesaid capital requirement.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(d) Credit risk (continued)

(ii) Analysis of credit risk exposures and risk-weighted amounts

The Group used the credit ratings from the following external credit assessment institutions ("ECAIs") for all classes of credit exposures mentioned below:

- Moody's Investors Services
- Standard and Poor's Rating Services

The process used to map ECAIs issue specific rating to the exposures recorded in the Group's banking book is consistent with those prescribed in the Banking (Capital) Rules.

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(e) Credit risk mitigation

As mentioned in note 4(a) to the financial statements on the credit risk management of the Group, the Group has established policies in managing and recognising credit risk mitigation, one of which is the taking of collateral and other credit enhancements. The principal types of collateral taken by the Group are also those of the recognised credit risk mitigation as prescribed in the Banking (Capital) Rules.

For regulatory capital calculation, the Group adhered to the criteria as stipulated in the Banking (Capital) Rules when assessing the eligibility of the credit risk mitigation.

Recognised collaterals include both financial and physical collateral. Financial collateral include cash deposit whilst physical collaterals include real estate. The exposure amount after mitigation is determined by applying the standard supervisory haircut stipulated in the Banking (Capital) Rules as an adjustment discount to the current collateral value.

On-balance sheet and off-balance sheet recognised netting is not adopted by the Group.

(f) Counterparty credit risk-related exposures

Regarding the Group's counterparty credit risk arising from the OTC derivative transactions, under both the banking and trading book, the Group's credit risk management framework as set out in note 4(a) to the financial statements applied. The Group managed and monitored the risk exposures by determining the current exposure amount of the transactions.

There were neither repo-style transactions nor credit derivative contracts entered by the Group at 31 December 2014 and 2013.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

3 Capital adequacy ratio and capital management (continued)

(f) Counterparty credit risk-related exposures (continued)

5 Cross-border claims

Cross-border claims are exposures of counterparties based on the location of the counterparties after taking into account the transfer of risk. For a claim guaranteed by a party situated in a country different from the counterparty, risk will be transferred to the country of the guarantor. For a claim on the branch of a bank, the risk will be transferred to the country where its head office is situated. Claims on individual countries or areas, after risk transfer, amounting to 10% or more of the aggregate cross-border claims are shown as follows:

	Banks	*Others*	*Total*
	$'000	$'000	$'000
At 31 December 2014			
Asia Pacific excluding Hong Kong	4,954,374	1,388,134	6,342,508
– of which China	4,954,187	1,388,134	6,342,321

10 Corporate governance

The Group fully complied with the requirements set out in the Supervisory Policy Manual module CG-1, namely "Corporate Governance of Locally Incorporated Authorized Institutions" issued by the HKMA in August 2012.

(a) Board of Directors

The Board is ultimately responsible for the operation and financial soundness of the Group. In meeting its overall responsibilities to stakeholders, the Board is to:

- ensure that the Group's management is competent by appointing a chief executive (including an alternate chief executive) with integrity, technical competence and experience in the banking business which enables him to administer the Group's affairs effectively and prudently
- oversee the appointment of other senior executives and ensuring that they are fit and proper to manage and supervise the Group's key businesses and functions
- approve and monitor the Group's business objectives, strategies and financial plan by:
  - approving annual budgets and reviewing performance against these budgets; and
  - approving the business continuity plan and ensuring it is subject to regular update.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

10 Corporate governance (continued)

(a) Board of Directors (continued)

- ensure that the Group's operation is conducted prudently and within the framework of law regulations and the Bank's policies by, among other things:
  - approving and periodically reviewing the risk management governance and policies of the Group to ensure that they are adequate and consistent with the Group's operating environment, and that adequate capital is maintained against the risks;
  - ensuring that senior management is implementing the strategies approved by the Board and developing suitable policies and procedures for managing the various types of risk; and
  - regularly reviewing the Group's financial indicators against performance and the established risk targets.
- ensure that the Group conducts its affairs with a high degree of integrity by, among other things, developing appropriate policies and codes of conduct that safeguard against improper or unlawful activities.

(b) Key committees functions and composition

The Board has ultimate and overall responsibility for the corporate governance of the Group. To assist its performance of the role, the following committees are established:

Audit Committee exercises oversight over objectivity, credibility and integrity of the financial reporting and other mandatory professional reporting requirements, and the work of the internal and external auditors. It is chaired by the independent non-executive director and its members consist of two non-executive directors.

Remuneration Committee exercises oversight on the Group's remuneration system and its operation, makes recommendation to the Board on the Group's remuneration structure, annual salary adjustment and performance bonus, and determines the remuneration package of key management personnel. It is chaired by a non-executive director and its member consist of an independent non-executive director.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

10 Corporate governance (continued)

(b) Key committees functions and composition (continued)

Risk and Compliance Committee assists the Board in monitoring the Group's risk profile and the Group's compliance with internal policies and statutory regulations. It is chaired by a non-executive director and its members consist of another non-executive director and the executive director.

Executive Committee assists the Board in conducting and managing the day-to-day business and affairs of the Group. It is chaired by the Chief Executive Officer and its members consist of Head of Operations and Technology, Chief Risk Officer, Head of Finance and Heads of Corporate and Institutional Banking.

Credit Committee is responsible for credit management. It is chaired by the Chief Risk Officer and its members consist of the Chief Executive Officer, Head of Finance and Heads of Corporate and Institutional Banking.

ALCO is responsible for monitoring liquidity risk and asset and liability management. It is chaired by the Head of Treasury and its members consist of the Chief Executive Officer, Head of Operations & Technology, Chief Risk Officer, Head of Finance and Heads of Corporate and Institutional Banking.

Operation and Technology Committee is responsible for formulating operations policies and procedures to ensure on-going operational efficiency, cost effectiveness and proper controls; reviewing standard service charges and fees; monitoring operational risk issues; formulating system and information technology ("IT") policies and practices; ensuring adequate IT control environment; and evaluating cost and effectiveness of IT systems employed by the Group. It is chaired by Head of Operations and Technology and its members consist of the Chief Executive Officer, Chief Risk Officer, Head of Finance, Head of Corporate and Institutional Banking, Head of Compliance, Head of Systems and Head of Treasury.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

10 Corporate governance (continued)

(c) Compliance with "Guideline on a Sound Remuneration System"

The Group fully complied with the requirements set out in the Supervisory Policy Manual module CG-5, namely "Guideline on a Sound Remuneration System" issued by the HKMA in March 2010. During preparation of this statement, a new Supervisory Policy Manual CG-5, namely "Guideline on a Sound Remuneration System V.2" was issued by the HKMA on 12 March 2015. An annual disclosure statement on remuneration will be separately prepared and published on the Company's website in May 2015 in accordance with the disclosure requirements as stipulated in the revised Supervisory Policy Manual CG-5.

Remuneration structure

The remuneration package of staff comprise fixed salary and variable remuneration. The objective is to ensure the package is competitive in the market so as to attract, retain and motivate the right talents. The proportion of variable remuneration shall vary according to roles and responsibilities, as well as performance.

Fixed remuneration refers to base salary, fixed allowances and year-end guaranteed pay (if applicable). Variable remuneration, mainly cash bonus payment, is awarded based on overall performance of the Group, the relevant business units and the individual staff member, taking into account the full range of current and potential short-term and longer-term risks connected with the activities of staff which may affect the performance of the Group.

Performance management

Performance of individual staff members is assessed against a number of pre-defined and measurable performance goals. The goals are determined according to the job responsibilities, areas of contribution covering both financial and non-financial factors, and strict adherence to the code of conduct, internal control policies, compliance standard and risk management requirements. The overall and balanced quality of staff performance is therefore measured and determined by not only financial achievement, but also non-financial indicators being an integral part of the performance management system.

Unaudited supplementary financial information (continued)

(Expressed in Hong Kong dollars)

10 Corporate governance (continued)

(c) Compliance with "Guideline on a sound remuneration system" (continued)

On-going review of the remuneration system

The Board and the Remuneration Committee provide oversight of the overall remuneration matters of the Group to ensure consistency with its culture, strategy, risk tolerance and control environment. The Remuneration Committee reviews the remuneration policy and system periodically or whenever necessary to ensure the Group's effective human resources management.

Remuneration for key management personnel

	2014	*2013*
Number of key management personnel (note (i))	5	6

	2014 *$'000*	*2013* *$'000*
Fixed remuneration (note (ii))		
Cash	7,097	*4,076*
Variable remuneration		
Cash	4,630	*2,290*

All six key management personnel was awarded sign-on bonus with a total of $1,837,000 in 2013. No key management personnel was awarded sign-on bonus in 2014. No key management personnel was awarded guaranteed bonus, deferred variable remuneration or severance payment in 2014 and 2013.

Notes:

(i) Key management personnel refers to members of Executive Committee.

(ii) The fixed remuneration included employer's contribution to provident fund.
